PERFIL PROFESIONAL

Systems Engineer with a solid track record in developing scalable web and mobile applications, specializing in the ecosystem of modern frameworks such as Angular, Ionic, Flutter, .NET Core, Spring, and NestJS. Proficient in multiple programming languages, including Java, C#, JavaScript, CSS/SCSS, and HTML5.

Expert in advanced Linux server administration and the management of relational databases (SQL Server, Oracle, MySQL, PostgreSQL) and NoSQL environments (Firestore).

Extensive experience optimizing the software development lifecycle by implementing CI/CD pipelines with Jenkins and managing repositories efficiently across GitLab, GitHub, and Azure DevOps.

Specialist in developing native Android applications and PWAs, backed by a Scrum Master certification. This enables me to lead projects under agile methodologies, ensuring high-quality deliveries and a collaborative, results-oriented approach.

PLATFORMS

- Visual Studio
- Visual Studio Code
- Android Studio
- Netbeans
- Dbeaver
- Jasper Studio
- Webstorm
- Gitlab
- CorelDraw
- Sql Server
- PostgressSQL

LANGUAGES

- Spanish – Native
- English – B2 (Intermediate)

PROFESSIONAL EXPERIENCE

Level II Programmer (Full Stack) – GESTION FRANCA S.A.S *(07/2024 – 04/2026)*

- Design and implement dynamic, modular web components using Angular, ensuring a smooth user experience and compliance with high frontend performance standards.
- Execute critical version upgrades for web applications from Angular v5.2 to v18, refactoring classes and components optimally to ensure backward compatibility and minimize impact on production environments.
- Build and deploy robust web services, microservices, and RESTful APIs using .NET Core, ensuring the scalability of business solutions.
- Model, manage, and optimize relational databases in SQL Server by creating efficient stored procedures, views, and functions for data management.
- Design and implement backup strategies and version control workflows, ensuring a clean and secure software development lifecycle through GitLab and Azure DevOps.
- Provide technical leadership for specific development modules under the Scrum agile methodology, ensuring technical debt mitigation and high-quality software deliveries.
- Technologies: Angular (v5.2 - v18), .NET Core, CSS3, SCSS, HTML5, SQL Server, PostgreSQL, Azure DevOps, GitLab, SCRUM.

Front-End Developer – HEXA SOLUTIONS *(10/2022 – 01/2024)*

- Develop and structure interactive, scalable web applications with Angular, applying best practices in clean architecture and state management.
- Design and build cross-platform mobile solutions using Ionic, achieving an excellent code reuse rate across different operating systems.
- Consume and integrate complex RESTful APIs and cloud services efficiently, ensuring data synchronization and consistency on the frontend.
- Guarantee visual responsiveness and frontend performance optimization by implementing HTML5, CSS, SCSS, and JavaScript/jQuery under cross-browser standards.
- Collaborate closely on data contract definitions (JSON) and deliver continuous value through efficient version control workflows in GitHub and GitLab.
- Design, modify, and deploy enterprise reports using JasperReports (Jasper Studio), successfully managing their rollout across pre-production and production environments.
- Technologies: Angular, Ionic, JavaScript, jQuery, CSS3, SCSS, HTML5, GitLab, GitHub, Jasper Studio.

Full-Stack Developer– HUMAN BIONICS *(01/2020 –10/ 2021)*

- Architect and code backend modules using object-oriented technologies such as Java (Spring) and .NET Framework, implementing efficient design patterns.
- Develop an E-commerce platform using Angular, successfully integrating shipping and logistics APIs for DHL and Servientrega.
- Lead technical decision-making and execute version upgrades for the company's native Android mobile application.
- Build modern web interfaces and PWAs (Progressive Web Apps) using TypeScript/JavaScript-based frameworks, boosting accessibility and loading speeds.
- Administer and configure servers in Linux environments, ensuring the correct operation and deployment of application services and databases.
- Lead the IT department, controlling the proper functioning of the company's various software applications, while implementing technical structure regulations and standards.
- Design relational and NoSQL data models, performing advanced queries in management systems such as Firestore, MySQL, and SQL Server.
- Design and integrate complex corporate reports using advanced reporting tools like Jasper Studio.
- Technologies: Angular, Java, Spring, C#, .NET Framework, Native Android, PWAs, Linux, Firestore, MySQL, SQL Server, Jasper Studio, DHL API, Servientrega API.

Front-End Developer – HUMAN BIONICS *(06/2018 – 02/2019)*

- Build and maintain the user interface of the company's core web applications using JavaScript, HTML5, and CSS/SCSS.
- Develop dynamic views and reusable components, ensuring responsive interfaces adaptable to multiple devices.
- Perform functional UI testing and code debugging using professional environments such as WebStorm and Visual Studio Code.
- Maintain version control of the source code through shared Git repositories within the development team.
- Technologies: JavaScript, HTML5, CSS/SCSS, WebStorm, VS Code, Git.

Graphic Designer – STICKER SHOP / CLASS DECOR / PLANET SOUND

2015 – 2017 (Periodos anuales)

- Create and vectorize advertising material, logos, graphic pieces, and visual identities for various brands using professional tools like CorelDraw.
- Manage the production of printed and digital graphic assets, ensuring the color quality and structural integrity of the final design.
- Technologies: CorelDraw, Vector Illustration, Advertising Design.

EDUCATION

2022 Scrum Master Certification
Bucaramanga *Credly.com*

2019 Systems Engineer (Bachelor's Degree)
Bucaramanga *Universidad de Investigación y Desarrollo - UDI*

2012 Technical High School Diploma in Systems
Bucaramanga Instituto Técnico Superior Dámaso Zapata
